

PRO TEST KIT

**DANGERS REAGENTS ARE CORROSIVE AND TOXIC!
KEEP AWAY FROM SKIN AND EYES! DO NOT INGEST!**

HANDLING

- When handling reagents always wear gloves, consider protective eyewear and mask.
- Only test in well-ventilated area, avoid flames.
- Have running water available to clean up after testing.
- Never open more than one bottle at once.
- Warm up reagents to room temperature before use.
- Avoid contamination, wash and fully dry all accessories after use.
- Use paper towels to quickly wipe and clean plastic supplies.
- Do not leave reagents unattended, keep away from children and animals.

HANDLING CRYSTALLINE REAGENTS IN GLASS BOTTLES

- 1. Right before use shake reagent bottle gently.
- 2. Wearing gloves use bottle against your hand to shake down reagent crystals from bottle cap.
- 3. To add crystalline reagent to sample use clean spatula or your nail relevant by tapping bottle label.
- 4. It is recommended to freeze crystalline reagent to sample to increase reaction intensity.
- 5. Wipe clean bottle cap and neck, avoid "cannulid lid syndrome" to protect reagent from air.

STORAGE

- 1. Keep away from heat and sunlight, refrigerate.
- 2. Do not remove all alcohol/volatile from the container.
- 3. Store bottles tightly closed, make sure there are no granules in the lid.
- 4. Test both on average shelf life of 2 years from manufacturing depending on storage conditions.

DISPOSAL

- 1. Clean used or spilled reagent wash with plenty of water and soap.
- 2. Dispose of unused reagents or materials that have been contaminated according to the appropriate local procedures, with respect to environmentally friendly hazardous waste disposal.

Before testing please read carefully all instructions relevant to your test kit.

EXPECTED 2C-X, METH/AMPHETAMINE OR MDMA TEST RESULTS:

If testing MDMA turns pink to how intense is the black color change, exact hue can vary a little.

MDMA / MDA / 5-MAPB / 6-APB	6-APB / OPIODS
METH/AMPHETAMINE / 2-FMA	4-FMA / ASPIRIN
CATHINONES	2C-B/C/H/I
2C-B-FM/C	BZP / CATHINONES / COCAINE / CAFFEINE / BUPROPION / KETAMINE

(2) MECKE REAGENT

Mecke reagent with MDMA turns instantly green + black, but the green will quickly turn gradually blue.

MDMA / MDA	5-MAPB / 6-APB
HEROIN / CODEINE / MORPHINE	EUTYLONE
2C-B	2C-B-FM / 2C-I / 6-APB
METHAMPHETAMINE / BZP / CATHINONES / DXM	AMPHETAMINE / COCAINE / CATHINONES / KETAMINE / ASPIRIN

(3) SIMON'S A+B REAGENT

Simon's reagent instantly turns blue with all secondary amines, even if other substances are present.

MDMA / MDA / PMMA / CMC / MMC	MDA / OTHER SUBSTANCES
-------------------------------	------------------------

(4) ROBADOPE A+B REAGENT

Robadope reagent slowly turns pink with all primary amines, even if other substances are present.

MDMA / OTHER SUBSTANCES	2C-X / AMPHETAMINE / MDMA / PMMA / TAURINE
-------------------------	--

(5) ZIMMERMANN A+B REAGENT

The violet / brown reaction can appear pale or in the form of violet spots instead of a uniform color change.

AMPHETAMINE / MDMA / EUTYLONE / HEROIN / BZP	3-MMC / 4-MMC / 5-MMC / 6-MMC / 7-MMC / 8-MMC / 9-MMC / 10-MMC / 11-MMC / 12-MMC / 13-MMC / 14-MMC / 15-MMC / 16-MMC / 17-MMC / 18-MMC / 19-MMC / 20-MMC / 21-MMC / 22-MMC / 23-MMC / 24-MMC / 25-MMC / 26-MMC / 27-MMC / 28-MMC / 29-MMC / 30-MMC / 31-MMC / 32-MMC / 33-MMC / 34-MMC / 35-MMC / 36-MMC / 37-MMC / 38-MMC / 39-MMC / 40-MMC / 41-MMC / 42-MMC / 43-MMC / 44-MMC / 45-MMC / 46-MMC / 47-MMC / 48-MMC / 49-MMC / 50-MMC / 51-MMC / 52-MMC / 53-MMC / 54-MMC / 55-MMC / 56-MMC / 57-MMC / 58-MMC / 59-MMC / 60-MMC / 61-MMC / 62-MMC / 63-MMC / 64-MMC / 65-MMC / 66-MMC / 67-MMC / 68-MMC / 69-MMC / 70-MMC / 71-MMC / 72-MMC / 73-MMC / 74-MMC / 75-MMC / 76-MMC / 77-MMC / 78-MMC / 79-MMC / 80-MMC / 81-MMC / 82-MMC / 83-MMC / 84-MMC / 85-MMC / 86-MMC / 87-MMC / 88-MMC / 89-MMC / 90-MMC / 91-MMC / 92-MMC / 93-MMC / 94-MMC / 95-MMC / 96-MMC / 97-MMC / 98-MMC / 99-MMC / 100-MMC
--	---

EXPECTED LSD TEST RESULTS:

(1) **ERLICH REAGENT**

Observe for at least 5-10 minutes. Even if only the sample turns purplish that still counts as a positive result.

LSD / 1P/LSD / AL/LAD / ETH/LAD / 5-HTP / OTHER MOODS	OTHER
---	-------

(2) HOFMANN REAGENT

Observe blotter or gel reaction for up to 1 hour. Even if only sample changes color that is still positive result.

LSD / 1P/LSD / ETH/LAD	5-HTP / OTHER
------------------------	---------------

USE TESTS (3) AND (4) ONLY IF (1) AND (2) DID NOT INDICATE LSD

If both the blotter turned purple or bluish, then it also a positive test result.

(3) MARQUIS REAGENT

Marquis and Mecke are highly consistent, do not mistake slowly charring paper with a color reaction.

DOC / DOI	TV-LSD / 3P-LSD / ALD-52 (WHITE BUTTERFLIES)	25C-NBOMe / 25C/ST-NBOMe
25H-NBOMe / 25I-NBOMe	25P-NBOMe / 25N-NBOMe	25M-NBOMe / 25I-NBOMe
25C-NBOMe / 25C-NBOMe	25E-NBOMe	DMT (NOT FOUND ON BUTTERFLIES)

(4) MECKE REAGENT

Marquis and Mecke are highly consistent, do not mistake slowly charring paper with a color reaction.

25E-NBOMe / 25P-NBOMe	DOC / DOI	25I-NBOMe / 25G/ST-NBOMe
25C-NBOMe / 25C-NBOMe	25H-NBOMe / 25I-NBOMe	25M-NBOMe / 25I-NBOMe
25T-NBOMe	DMT (NOT FOUND ON BUTTERFLIES)	

USE TESTS (3) AND (4) ONLY IF (1) AND (2) DID NOT INDICATE LSD

If both the blotter turned purple or bluish, then it also a positive test result.

(3) MARQUIS REAGENT

Marquis and Mecke are highly consistent, do not mistake slowly charring paper with a color reaction.

25H-NBOMe / 25I-NBOMe	25P-NBOMe / 25N-NBOMe	25M-NBOMe / 25I-NBOMe
25C-NBOMe / 25C-NBOMe	25E-NBOMe	DMT (NOT FOUND ON BUTTERFLIES)

(4) MECKE REAGENT

Marquis and Mecke are highly consistent, do not mistake slowly charring paper with a color reaction.

25B/25C/25D-NBOMe / 25C-NBOMe / 25C-NBOH	25H-NBOMe	25I-NBOMe / 25I-NBOF / 25I-NBAID
---	-----------	-------------------------------------

EXPECTED LSD TEST RESULTS:

(1) **ERLICH REAGENT**

Observe for at least 5-10 minutes. Even if only the sample turns purplish that still counts as a positive result.
